

# Norwegian Research and Education Cloud

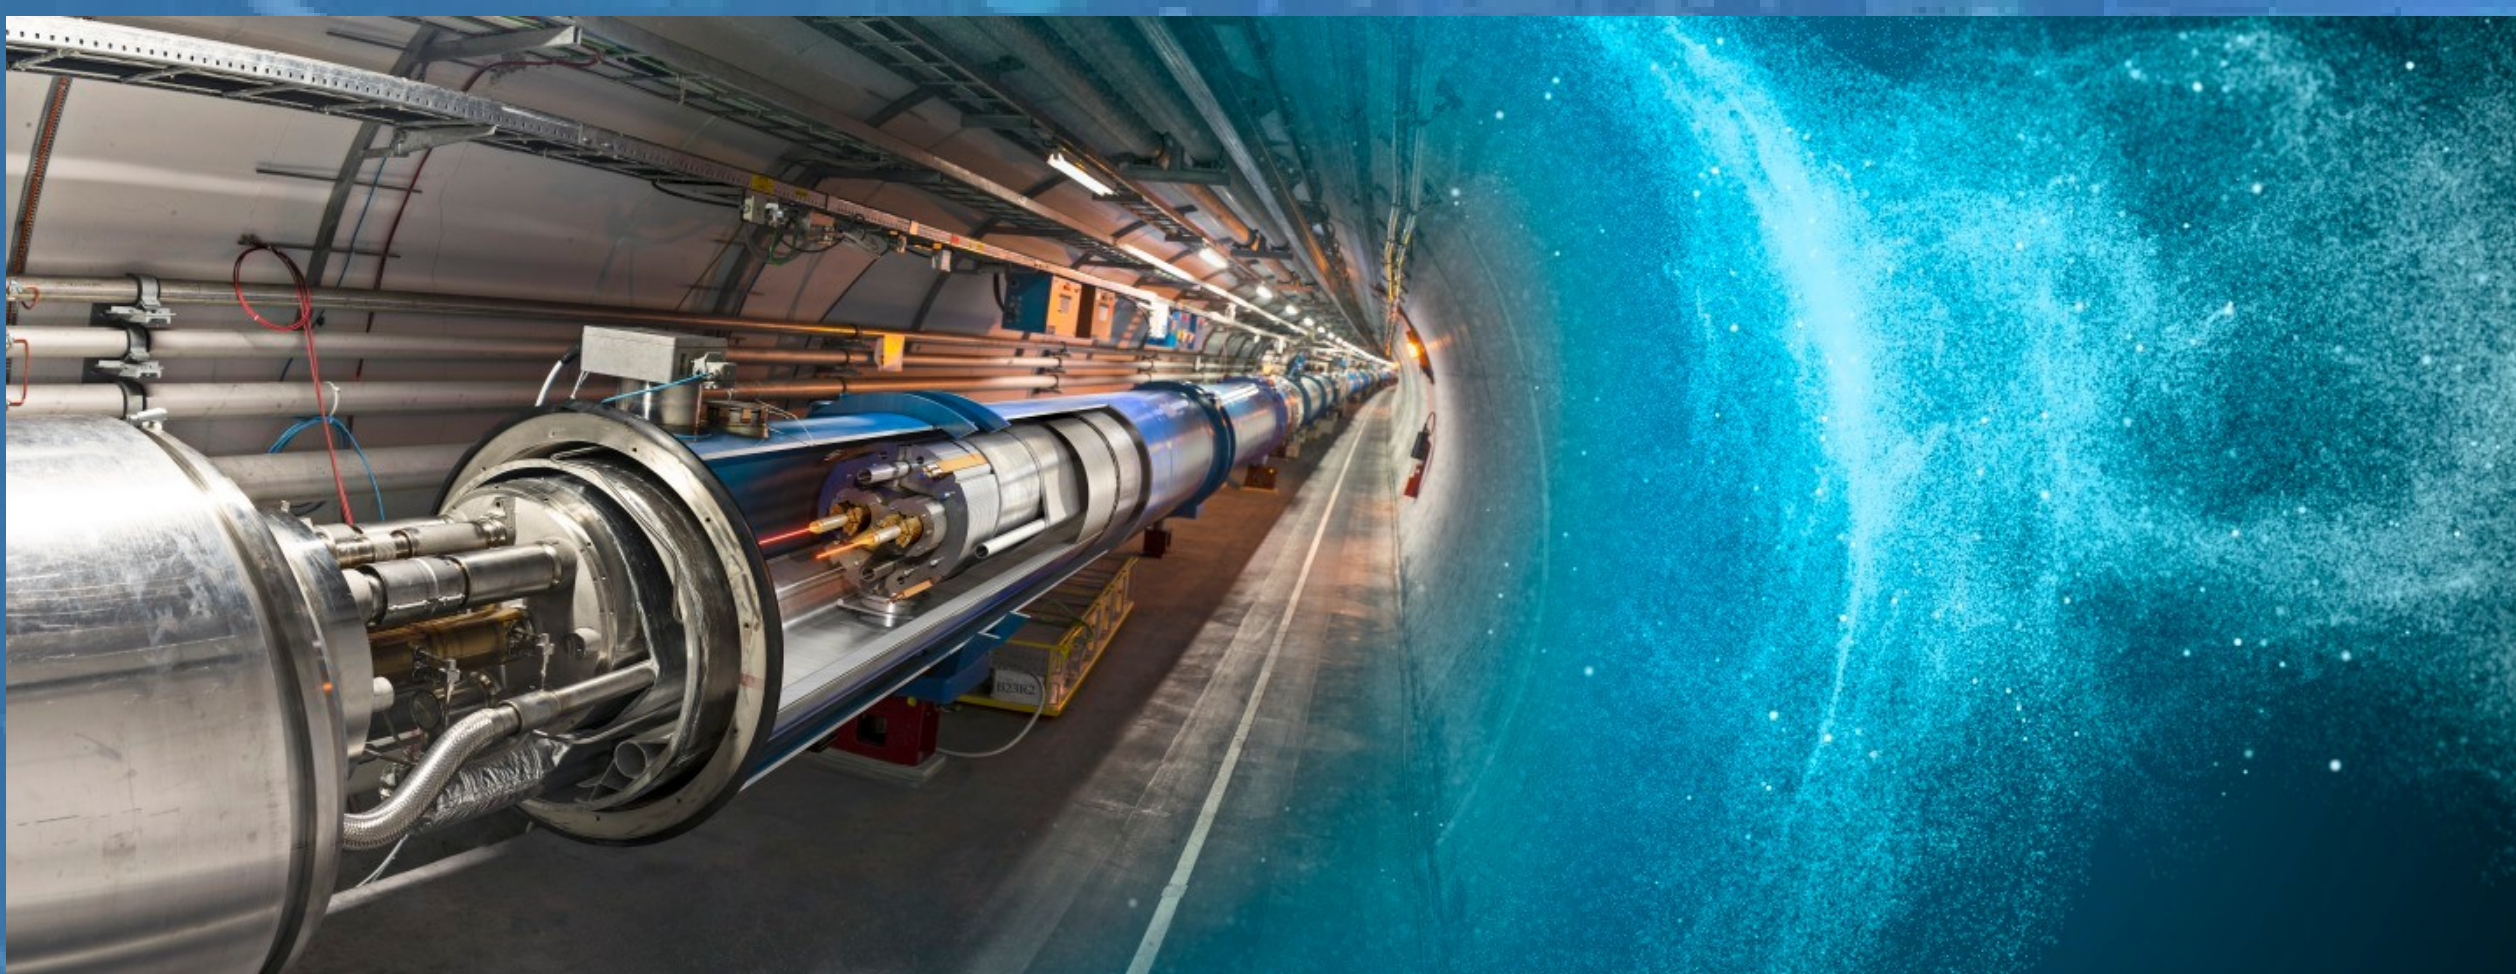

- Community *Infrastructure-as-a-Service (IAAS)* for the Norwegian higher education sector since 2016
- *OpenStack*: Self-managed Linux and Windows virtual machines and containers
- *Ceph*: Distributed block and object storage
- HPC, AI and DNS infrastructure
- Active support team
- Servers in Norway
- Run by University of Bergen and University of Oslo

## NREC

### What runs in NREC?

- 1800 private/collaborative projects and 1400 users in research and education (January 2024)
- HPC for CERN: NREC is a Tier 1 compute center for ATLAS and ALICE experiments, as part of the Worldwide LHC computing grid. Computing: 35 million CPU hours yearly, 12 PiB (hot/cold) data and 160+ TiB cached job data
